SUMMARY	Software Engineering student at 1337 Coding School (42 Network) with strong experience building real-time systems, containerized infrastructure, and full-stack web applications. Skilled in Next.js, Node.js, PostgreSQL, and DevOps tooling. Passionate about building production-ready products and solving complex technical challenges.
EDUCATION	1337 Coding School (42 Network) Computer Science Student Tetouan, Morocco 2023 – Present
SKILLS	▪ Languages: C, C++, JavaScript, TypeScript ▪ Backend: Nest, Express, REST APIs, WebSockets ▪ Frontend: Next.js, Tailwind CSS ▪ Databases: PostgreSQL, Prisma ▪ Payments: Stripe, Third-party API Integration ▪ DevOps & Infrastructure: Docker, Linux/Shell ▪ Tools: GitHub, VS Code, Linux CLI, Prisma Studio
PROJECTS	Vixora – Full Stack Media Service Platform: • Built a production-ready Media subscription platform with Next.js 14 App Router. • Designed PostgreSQL database schema with Prisma ORM covering Users, Subscriptions. • Implemented REST API routes with bcrypt password hashing and Zod validation. • Applied SEO best practices: metadata API, sitemap.xml, robots.txt, and JSON-LD. • Deploying on a VPS with Nginx, PostgreSQL, SSL, and PM2 process management. ft_transcendence – Real-time Multiplayer Soccer Game (Team Project) : • Built responsive frontend with Next.js featuring custom pixel-art visuals and smooth cross-device gameplay. • Implemented low-latency multiplayer features, including input handling and server validation physics, collisions, and state sync. Inception – Full Containerized Infrastructure: • Deployed multi-service system with Docker Compose (Nginx, MariaDB, WordPress) with production-grade isolation Minishell – Custom Unix Shell in C: • Built a bash-like shell from scratch with command parsing, process management, pipes, and redirections
